MICHIGAN MELTDOWN VOL. 2

DUP-102503-10/25/70-DETROIT: A policeman holding a rifle cruises near a Black Panther party headquarters on Detroit's west side late 10/24 where Black Panthers had barricaded themselves after one policeman was shot and killed and a second wounded. This badly damaged

While volume one of this series was highly acclaimed by tastemakers the likes of Julian Cope and the audio aesthetes at WFMU, volume two manages to ratchet up the intensity. More weirdos. More outcasts. More dudes who did not smell good. Meltdown chronicles the darker side of the post-garage and pre-punk era ('68-'75) in the Great Lakes state. An overabundance of fuzz guitar, primitive riffing and overall outré vibes permeate this collection of nobodies, malcontents and general black sheep of society. No doubt you've NEVER heard any of the groups here, but if songs about space flight, mental health problems, substance abuse or having absolutely no money are your thing, there's plenty to sink your teeth into here. All songs are previously uncompiled and mastered directly from the original 45's (NO MP3's!) coupled with full-color label scans and insightful, hysterical liner notes. Much in the same manner second volumes of compilations from the same family like Michigan Mixture and Michigan Mayhem, this edition of Michigan Meltdown only further cements the solid reputation of this collection. Giddy-up.
