Just months after reviving *The Departing of a Dream* series from a ten-year hiatus -- Loren Connors issues another movement of saturated guitar tones, dissonance and impermanence.

*Volume Six* begins with the percussive sound of struck, muted strings -- an unusually rhythmic effect for one of Connors solo recordings, writes Kurt Gottschalk in *The Wire*. But from there, Connors' guitar notes morph into gentle wisps of guitar sounds -- or as Connors himself describes: "just like the wind scattering the notes around."

The mini-album is presented as a 10-inch record with artwork by Connors -- a faint, subtle outline of a woman's face. One-time edition of 500 copies, includes download coupon.

### Track Listing

- A. Part One
- B. Part Two

### Selling points

- Connors was on the cover of *THE WIRE* for July's issue. He is an avant-garde legend, his singular alien take on the blues is considered on par with John Fahey's rewrite of American string music.
- Connors' previous vinyl releases for Family Vineyard quickly sold out.
