### RELEASE BIO

Acclaimed Sacramento rock outfit So Stressed expand upon their traditional arrangements to deliver their strongest and most intimate record yet.

Pale Lemon is the result of So Stressed trying their hand at crafting quiet, melodic pop songs; a big departure from their previous output, 2017's Please Let Me Know. This was also the first time they (Kenneth Draper and Morgan Fox) had written as a duo rather than a trio. Rather than letting their work be dictated by their limited capabilities as musicians, they attempted to go beyond power chords and yelling and make songs that more closely resembled their own musical tastes. The songs on Pale Lemon expand upon their prior arrangements of electric guitar, synthesizers, and drums by including cello, violin, flute, piano, tape loops, drum machine, pedal steel guitar, melodica, kalimba and other instruments. Kenneth and Morgan wrote this album quickly in an attempt to avoid imposing too many rules or limitations on the creative process. The goal was not to overthink things if it could be helped. The result is a record that ranges from bright, energetic indie pop to short acoustic jingles to long, peaceful drones. Lyrically, the album deals with the warmth, joy, and work of being in love.
