HOSTESS IN JAPAN  
VINYL NOT RETURNABLE

### ABOUT THE ALBUM

Jamila Woods's cultural lineage – from her love of Lucille Clifton's poetry to letters from her grandmother and the late '80s post-punk of The Cure – helped structure the progressive, delicate and minimalist soul of *HEAVN*, her debut solo album. *HEAVN* was originally released in the summer of 2016 on Closed Sessions and is now set for a re-release by Jagjaguwar and Closed Sessions in October 2017.

"It's like a collage process," she says. "It's very enjoyable to me to take something I love and mold it into something new." A frequent guest vocalist in the hip-hop, jazz and soul world, Jamila has emerged as a once-in-a-generation voice on her soul-stirring debut.

Born and raised on the Southside of Chicago, Woods grew up in a family of music lovers. She is an artist of substance creating music crafted with a sturdy foundation of her passions and influences. You'll find the bits and pieces of her past and present that make Jamila: family, the city of Chicago, self-care, and the black women she calls friends. True and pure in its construction and execution, her music is the best representation of Jamila herself: strong in her roots, confident in her ideas, and attuned to the people, places and things shaping her world.
