OVERVIEW :

Positivity is a rare commodity these days.

Mythless is the most aggressively major-key-laden, percussive-heavy, heart-warming experimental music you're likely to hear. The new guitar-worshipping project from Fang Island co-founder Jason Bartell is at once heavy, anthemic, pensive, and triumphantly hopeful.

The debut EP *Patience Hell* somehow exists at the intersection of trance-metal and meditative-hardcore. Driven by the shredding, drone-like drums of fellow **Fang Island** expat Marc St. Sauveur, **Mythless** flirts with the tech-y music of their peers, but seems to share more DNA with Enya than The Dillinger Escape Plan. The band's unabashed guitar rock exists without ego and without irony. It comes from a place deep inside. Bartell's artistic candor seems to possess a brazen joy and obliviousness to judgement, like watching a stranger in the car next to you belt out a Journey song without a care in the world. It's beautiful, and infectious.

This release is pressed on 12" one colored vinyl with music on Side A and custom artwork screen-printed on Side B.
