PHILLIP WERREN Electronic Music - LP Box Set

- Reissue of incredibly rare 1971 experimental electronic album
 - 4xLP set housed in exact replica silk-screened box
 - First time reissue on vinyl

An astounding, epic journey into the more obscure areas of early electronic music, Phillip Werren's *Electronic Music* is well-spring of contemporary composition across four LPs. Originally released in 1971 in an edition of 100 copies, this impossibly rare piece of early Canadian electronic music has finally been reissued on vinyl in an exact replica box with a silk-screened cover.

Electronic Music was recorded at Simon Fraser University (Vancouver), McGill University (Montreal) and Radio Warszawa (Poland) between 1967 and 1971. Influenced as much by serialism as by psychedelia and the occult, the album features elements of tape collage, voice, and experimental composition. Most of the recordings were performed on a Buchla System 100, one of the first modular synthesizers. An absorbing piece of the Canadian avant-garde, *Electronic Music* is a journey through space, sound, texture, and unbridled experimentation.

Recommended for fans of artist ranging from Stockhausen, Xenakis, and Ferrari to Basil Kirchin, Conrad Schnitzler, Throbbing Gristle, and Coil - Manufactured Recordings' reissue of *Electronic Music* aims to shed light on this crucially overlooked composer. Limited to 500 copies worldwide.
