### RELEASE BIO

Late in 2014, **Stepdad's** tour van was broken into and several things were stolen, the most important of which was the hard drive that contained a good chunk of what was to become their new full-length album. Many a tasty jam and critical banger were lost in what we've come to call "The Great Banger Heist of 2014". Despite what was lost, 4 of the songs were already finished, and made it out alive. These are the survivors. This is ***Masterbeast Theatre***.

While the band is still hard at work starting over from scratch recording an new full-length, *Masterbeast Theatre* is here to fill the void, and to make sure their rabid fans know they're not lying in some ditch somewhere dead. What's more, this 'filler' is all thriller!
