BIO

While supplies last, we are offering this very special limited-edition vinyl-only double album, *Music For A French Elevator And Other Oddities*. Originally available as a part of the hugely acclaimed, super-deluxe **A Dot In Time**. box set, *Music For A French Elevator* compiles all of **the Books**' non-album tracks into one fittingly surreal package befitting the group who essentially created their own genre (often reluctantly described as "collage-pop").

A total of 45 tracks are here, including standouts and longtime favorites "Classy Penguin," "8 Frame," and their sublime **Nick Drake** cover "Cello Song Feat. **Jose Gonzales**." Along with their commissioned pieces for the 1% art and sound installation in the Ministry of Culture in Paris, France, the collection includes **the Books**' unreleased film score for the feature-length *Biosphere 2* documentary, a stellar collection of counterpoint electroacoustic explorations that emanate the kind of wry charm and wit that became a staple of **the Books**' music.

Packaged in an impeccably designed die-cut jacket w/ metallic inks, this collection proves that even **the Books**' non-album material is worthy of emphatic celebration and adoration.
