SALES POINTS

- The new album from acclaimed Australian post-everything improv quintet, **TANGENTS**
- Recently toured with **MONO**, and **TORTOISE**
- **RIYL: CAN, FOUR TET, TORTOISE, THE NECKS**

BIO

After an eventful year of touring throughout their native Australia – including runs with labelmates **MONO** and like-minded pioneers **Tortoise** – and featuring alongside the work of artist **David Hockney** at the National Gallery of Victoria, post-everything quintet **Tangents** return with another album, and another stylistic detour.

New Bodies continues **Tangents'** rummage through countless varieties of electronics, rock, dub, noise, and free improv jazz that defines the group's acclaimed aesthetic. A spacious, plucked cello gives way to a minimalist breakbeat tableau resting over rhythmic prepared piano; a staid electronic groove is gradually absorbed into washes of frenzied improv; staccato synths are woven into tumbling avant-rock; and shimmering free drums phase over static loops of piano, guitar and cello.

To quote *FACT Magazine*, "The quintet are so comfortable working with jazz, folk music, post-rock and electronic music that it comfortably hangs in a space between them all." On *New Bodies*, that description rings more intuitive and authentic than ever.
