Mr. Science was a linchpin of the Indiana punk scene in the late 1970s and early '80s. As a member of Dow Jones and the Industrials, Science added a mass of bleeping, lurching technology to the roaring punk anthems and penned the crazed "Damage" and "Latent Psychosis" tunes.

He was also the DIY engineer at Zounds Studios in West Lafayette -- where he recorded some of the state's classic punk/art records: Amoebas In Chaos' *On To Mayday* LP, The Jetsons' "Suicidal Tendencies" 7-inch, the Dancing Cigarettes EP, the Industrials' famed *Hoosier Hysteria* LP.

In 1978, Science -- also known as Brad Garton -- began writing twisted new/no wave songs on keyboards, Moog, Orchestron, organ, synthesizer and other newfangled instruments of the day. He recorded them on a TEAC A-2340 reel-to-reel.

This 1978-79 EP compiles five songs that survived from that era -- four unreleased until now and available for the first time since their recording nearly 40 years ago.
